# Master of Innovation Leadership and Entrepreneurship

Effective Fall 2018, the program will be called Master of Innovation Leadership and Entrepreneurship (ILE). Under this new name, students have the option to pursue two concentrations: Entrepreneurship or Innovation and Leadership. These concentrations give students the opportunity to focus on entrepreneurial skills needed to lead innovation and change in an existing organization (following the Innovation and Leadership concentration), or the creation of a new venture (following the Entrepreneurship concentration). As a whole, the ILE is intended to build a foundation in intrapreneurial and entrepreneurial concepts and skills. Students focus on identifying, driving, and leveraging innovation for both internal and external opportunities. This applies to social entrepreneurship (e.g., non-profit/hybrid) and for-profit enterprises, from new or small to larger organizations.

Please see the updated program curriculum below.
