Program Review Survey

Provost Carter has asked the Task Force on Rationalization to review all licensure programs that have graduated an average of less than five students per year for the past five years for discontinuation or as a basis for collaborating with other universities in program delivery.

To that end the task force has developed a set of questions based on the criteria developed for the last universitywide undergraduate review (please see attachment).

Please briefly respond to the questions below. In addition, please feel free to respond to any of the criteria on the attachment.

1. Discuss how this program is central to the mission of the university.

2. Describe the impact of your program on the community and cite any advantages due to its location at Western.

3. Please describe any features of your program that gives it a unique niche.

4. How many courses are taught in your program that are EXCLUSIVELY for your teacher education program (i.e., for teacher education students only)? Please list the faculty members who taught these courses and the student enrollment in these courses for the past two years.

5. What equipment, if any, is required exclusively for this teacher education program?

6. Discuss the demand for graduates for this teacher education program.

7. Discuss the impact of your teacher education program on the community and cite any advantages due to the program being at Western.

8. Who, fulltime to the university, coordinates the program?

9. Who are the fulltime faculty members in the program licensed in the area and are qualified to teach “methods” courses and supervise field experiences?
