Pictorial MI Survey

Directions:
Use a blue crayon to mark your 1st choice.
Use a red crayon to mark your 2nd choice.

At school, I like to study:

- Letters and words
- Music and dance
- Space
- Numbers and math
- With my friends
- Maps and graphs
- By trying things
- Animals and plants
- All by myself
I am happy when I:

- Listen to music
- Am alone
- Learn about nature
- Move
- Pray
- Share
- Read or listen to stories
- Draw or color
- Play games

At home I like to:

- Play video games
- Make music
- Do puzzles
- Play alone
- Dream about possibilities
- Explore outside
- Experiment
- Talk on the phone
- Read or look at books
I am good at:

- cat
- bat
- sat

Making rhymes    Writing stories    Figuring out how things work    Sports

Praying    Growing things    Making friends    Learning about people and myself    Arts and Crafts

I like to think about:

How plants grow    What I will be when I grow up    Painting and creating    Spending time with family and friends

How numbers work    Building things    Characters from stories    Aliens and Space    Beautiful music
**Teacher Directions and Notes:**

- This survey may be used individually, in small groups, or as a class.
- If your student(s) do not read, read the prompt and then read each answer as you point to the corresponding picture.
- You may want to do just one page at a time.
- Encourage children to come up with their own answers rather than picking what seems popular with their peers. Make sure they know all answers are good and can be “right”.
- Remember, MI surveys are a snap shot of one moment in time, not an assessment tool to pigeon hole children for life, or even the year!

**Scoring:**

You may score on this sheet by highlighting students blue answers in one color and their red answers in a different color, or you may use the blank grid which follows.

Score two points for each blue (1st choice) circle and one point for each red (2nd choice) circle. Total each column. Consider the top two to four Intelligences to be strengths for the student.
