

Collaborate:

A series of campus conversations

Improve the Total Experience

Questions to Consider:

- Are we doing what we need to, to tell our stories of excellence? Are we sharing our alumni successes, leadership, undergraduate research, academic service learning, community engagement and impact?
- Does everyone believe that they are valued for their contribution to the growth of WCU and the success of our students, staff, faculty and alumni?
- How might we integrate technology more thoroughly into the teaching and learning environment to harness our student's desire to use the digital environment?
- Does each WCU student enjoy a "total student experience", or do some students have narrower collegiate experiences than others?
- Are there areas, such as personal health and wellness, where WCU can expand its programming for the benefit of our students and their growth?
- Are there best practices in academic departments or student life which need to be scaled for more or all of our students?
