Creating Stained Glass

CULLOWHEE – Western Carolina University’s Office of Continuing Education will once again offer a 6-week course in the Tiffany method of creating stained glass.

The Tiffany method involves wrapping pieces of glass wrapped in copper foil and then soldering it. The class will cover safety, proper cutting techniques, foiling techniques and simple metal framing as well as types of glass, solders, and copper foils.

Each student will complete an individualized project in colored glass by the end of the course. More advanced students will be able to work on their own projects at will. Students will be expected to purchase their solder, foil and glass. All other tools will be provided. (Some products may be purchased in class.)

Moya O’Neal will be the instructor. Moya is an experienced stained glass artist, excellent teacher and enjoys teaching adults. Classes will meet in the south lobby of the Cordelia Camp Building on Western’s campus from 6-9 p.m. The cost is $85.00. To register call 828-227-7397 or visit http://learn.wcu.edu and click on conferences and community classes.

Students will need to bring safety glasses, pen, pencil and felt tipped pen, paper for notes, a box to carry your glass and tools (about 12 X 12), cotton garden gloves (glass is sharp and molten solder is very hot), band-aids and an open mind. The cost is $ 85.00. Call 828-227-7397 if you have questions.
