Directing photography at work

“David has requested that this photo be shown at his PCP meeting…He is doing an awesome job at work!”
I like it much, EMT (Emergency Medical Technician), helping people sick and hurt and in wrecks… Learn a lot up here. WCU.- David
Why inclusive research?
## Inaccessible research with individuals with ID

- Researchers often don’t reduce complexity when explaining research content or purpose.
- Methods (surveys, interviews, focus groups) modifications are limited.
- Limited transportation options to engage in research activities that are designed to be participatory and ongoing.
- Feeling that opinions are ignored by professionals.
Recommendations

• Teach participants the research process
• Develop easy to understand approaches to seek consent
• Use multiple and intensive data collection strategies
• Presume participants’ credibility
• Use plain language
• Produce dissemination materials that are universally accessible and meaningful
What is PAR?
Participatory Action Research

• “a research approach that consists of the maximum participation of stakeholders, those whose lives are affected by the problem under study, in the systematic collection and analysis of information for the purpose of taking action and making change” (Nelson, Ochocka, Griffin & Lord, 1998)
Participatory Action Research (PAR)

**Expertise**
- Participants are experts of environs and experiences
- Lacked by ‘outsiders’

**Knowledge**
- Co-created
- Amplified
- Usefulness

**Values**
- Self-determination; democracy; social justice; collaboration; equity

**Actions**
- Participants formulate problems; construct solutions; collect & analyze data; disseminate; plan
Our efforts to make PAR accessible and meaningful.
Seb: Western Carolina University
What is photovoice?

- **Recording** experiences via photography
- Photographs **promote** dialogue
- Participants **convey** experiences, interests & concerns to broader audience.

*I am learning how to walk to classes and how to be a… I don’t know… a grown up, I guess.* Anna, 2nd Year Participant
Why use Photovoice in PSE research?

• Photography **concretizes** more abstract modes of expression (Booth & Booth, 2003)

• **Engages** people with limited social and communication abilities” (Jurkowskii & Paul-Ward, 2007)

• Talk no longer has to stand in for complex experiences that words have difficulty capturing (Larsen, 2008)

• Photographs can **reveal realities** that researchers and the public are unable or unwilling to access” (Wang, 1999)

---

I’m doing the same thing that any other student does- doing homework, getting assignments done when they are due… I might do it a little differently…but I’m still getting it done. Andy, 2nd Year Participant
Providing student support

• What is a story? Practice telling one’s college story.

• Technical training, pictures & direct application; mitigate camera damage & loss (carrying case is essential)

• Photograph etiquette/ethics training

• Practice and feedback

• Brainstorm prior to photography; use images to create a list of reminders for low literacy
Training topics: holding a camera; lens obstruction; centering; background distraction; lighting; flash; zoom; camera etiquette; ‘themes’; storytelling

If you are outside, make sure the sun is behind you when you take a picture.

Is it OK to take anyone’s picture?

What should you do before taking anyone’s picture?

Using Flash
Practicing technique

As a team

Go outside

with your cameras and

take 4 pictures each of things that say WCU or have a catamount

Show me you know how to ZOOM and take good pictures.

Show me your pictures. Then we'll practice taking people pictures.
[In] Intro to CJ (criminal justice), right now we are learning about police and civil rights. It’s kind of interesting; we talk about different cases and different topics…”

Learning the iPads and Cameras
Concept Mapping
Student Focus Groups
Mock & Love (2011)

1. Describe a typical day at college?
   - How do those activities make you feel?
   - In the next 5 years, where do you envision yourself?

2. Why did you choose to take this picture?
   - Tell me what you see in this picture?
   - Why do you think this event is important to you?
   - How do you feel about this picture?

3. What do you think about the theme?
   - Do you see any other examples where ________ occurs?
   - What other things do you see occurring with your projects?
1. What is your favorite/best thing that you have done on the campus?
   a. How did those events or interactions make you feel about yourself?

2. What did you learn about yourself now after going to college?

3. How do you think going to the college has changed you as a person?

4. If you were to tell someone about your college experiences, what would you say?

# Two student cohorts

- Worked with two cohorts of students 1-2 times a month over the course of two semesters to complete all phases

- Location of work: colleges, high schools, town libraries

- Students took over 300 photos or videos

- Posted on Voicethread; over 200 comments
Assume role of research facilitator

To promote and sustain engagement of participants, the researcher assumes the role of research facilitator. In this position, the research facilitator:

(a) establishes and encourages relationships between all participants,

(b) promotes effective communication strategies and supports,

(c) enables productive work from all members, and

(d) ensures that all members benefit from the process (Stringer, 2007; Wadsworth, 2006).
# PAR Toolkit

- Camera, pocket video camera, or digital recorder
- Printed directions for selected camera or recorder
- Extra batteries
- Printed directions to change the batteries and recharging
- Permission form for taking photos
- Contact information for the research facilitator
- Flash drive to store all the images
Data collection guidelines

- What places do you go to on the college campus?
- What do you do there?
- Describe your best day at college.
- Describe the hardest day at college.
- Any advice for younger students?
VoiceThread

Express your presence with incredible simplicity. **M/5 Commenting** will transform the way you discuss media.
Think College Student Research on VoiceThread
PAR Benefits
PAR Benefits for Students

- Improve identity and confidence (Booth & Booth, 2003)
- Capacity/skill building & sense of ownership (Jurkowski, 2008)
- Build capacity for advocacy (Kramer, Kramer, Garcia-Iriarte, Hammel, 2011)
- Involvement and self-determination influence one another (Wehmeyer, et al., 2011)
- Conceptualize and reflect on college experience.
- Stories are a resource- access to resources

I was a little bit scared because I went to the bottom, but I knew my friends were there. They were teaching me how to stand up and jump in without being afraid. Ashley, 1st Year Participant
PAR Benefits for PSE Research

• Consistent with ethos of inclusion
• Revealing perceptions & diverse understanding develop PSE programs
• “counterbalance the power differentials typically held between researchers and people with intellectual disabilities.” (Kramer, Kramer, Garcia-Iriarte, Hammel, 2011)
• Build awareness/ challenge views of incompetence
Recommendations
Develop easy to understand consent forms

**How long will this evaluation project last?**
The project will last at longest through the spring 2013 school semester.

**What are the benefits and risks of partnering in this evaluation project?**
If you want printed copies you will receive copies of your photographs. You will learn about doing research in the college environment. You will be able to tell your own stories related to your photographs, express your feelings and opinions that will help make the UP Program and WCU best support present and future UP participants. The main risk is that someone will recognize you in the photographs.

**Will I be paid for participating in this evaluation project?**
You will not be paid for participating in this evaluation project.
Sample Mixed-Method, Participatory Design

Natural Supports

- Quant.
  - Perceptions of participants:
    - Social Support
    - Sense of Community
    - Loneliness

- Qual.
  - Open ended questions
  - Focus group
    - Explicate surveys

UP Participants

- Qual.
  - Photography
  - Semi-structured interviews

- Interpretation
  - Survey results inform focus group and focus group results

- Interpretation of [quant + qual] + QUAL

- Compare & contrast results

- Photovoice Analysis & Interpretation
Analysis Paralysis

- Just get started.
- Don’t fixate.
- Start small
- Make improvements with each iteration.
- Partnerships in planning & research. Include students!
Please reference the UP website for further information
