1. Connect to WCU-NetworkSetup

2. Open a browser and navigate to: networksetup.wcu.edu

3. Click "Start" to begin the wizard

4. If this warning appears, click “Run Add-on”
5. If this dialog box appears, click “Run”

6. Enter your WCU user name: paws1@catamount.wcu.edu

7. Enter your MyCat password

8. Click “Continue”

If a successful connection does not occur, please refer to the troubleshooting section of this guide.
Troubleshooting

Connect directly to the WCU network
Use the same WCU credentials

Wireless Network Access

Students
Students should connect to the "WCU" wireless network for wireless service. This network requires security and encryption to keep your information private and safe and will require some configuration. To configure the connection on a computer or laptop:
1. Go to networkssetup.wcu.edu (or click the link to the right) and run the tool provided.
2. When prompted, insert your catamount email username (the email address without

Navigate to wifi.wcu.edu and run the Wireless Repair Tool
After running the Wireless Repair Tool, reboot the computer and repeat the setup process.

Power cycle device
Power the device off and back on again after configuring network

If you continue to experience issues, please bring your device to the Technology Commons or call the Help Desk at 828.227.7487
