B.S. Construction Management

The BSCM program is designed for students interested in the technical aspects of managing a construction project from the planning phase through to completion. Students gain knowledge of the construction industry and construction operations, as well as extensive training in construction related business and project management applications.

Unique characteristics of the program include a required 400-hour internship that allows them to gain actual hands-on, project-based industry work experience before graduation. Students also earn a minor in Business Administration that allows them to gain an understanding of the business side of the construction industry.

Master of Construction Management

The MCM program is designed for working professionals looking to advance their careers in the construction industry and welcomes professionals from all industry sectors and backgrounds including residential, commercial, industrial, and heavy civil.

Working professionals have the flexibility of completing the 100% on-line asynchronous 30-semester hour program at their own pace while continuing their career.

The program is designed with sufficient flexibility to permit students to select a combination of courses in applied and supporting areas to meet individual career needs.

Applications are accepted on a continuous, year round basis.

Applied and
Natural Science
Accreditation
Commission

The B.S. Construction Management Degree is Accredited by the Applied and Natural Science Accreditation Commission of ABET

Maximize Your Experience!

Career fairs are excellent opportunities to meet with potential employers offering full-time, part-time, and seasonal jobs and Internships. Here are a few tips to help you make the most out of your time here:

1. Get your bearings. Take a few minutes to review this booklet and the map for the fair, including the organizations on the concourse. Note that each employer sign will have the table number on the bottom right corner to help you navigate.

2. Prioritize the employers you're most interested in. If your schedule allows, you may find it easiest to start with the employers in which you're less interested. This will allow you to hone your approach and to be most confident when you approach the employers you're especially excited about.

3. Be flexible. The fair booklet provides a summary of employers' opportunities and may not have been submitted by the same people who come to the fair. Some positions may no longer be available and other openings may have just emerged. No single employer representative is knowledgeable about all positions available, but they can all share insights into the organization.

4. Be open. Take time to talk with employers that may not immediately jump out to you. Inquire about the various opportunities in their organization or maybe their geographic areas. You never know who the representative might know!

5. Introduce yourself and be prepared to give your "career pitch." Say "hello" and state your name. Have a few ice breaker questions in mind. Be ready to talk about your career interests as well as academic and extracurricular experiences to show your skills and strengths. Have your resume readily accessible to give to the employer.

6. Take notes when you inquire about next steps and the possibility of talking with additional managers. The representative at the fair may not be

able to answer all your questions or know specifics about your job interests. Write down the names, telephone numbers, etc. of other staff in the organization whom you can contact later. There is a notes section in this booklet for your convenience.

7. Ask the representative for their card, and then promptly send a thank you note. Having the business card of the representative you have just spoken with serves two purposes. First, you have a direct contact with the organization, including the proper spelling of the representative's name, direct telephone line, etc. Second, a brief thank you note acknowledges the help they gave you and the time they took to visit campus.

8. Respect employers' materials/sample items. Some employers bring large quantities of "give aways" clearly intended for students to take. Other employers bring a few copies of print materials, sample products, etc. as displays at their tables. Always check with employers before taking materials from their tables and do not grab give away items from employers you've not spoken with.

9. Be courteous! In addition to representing yourself, you also represent your department and the University. All of the organizations at the fair are here because of their interest in hiring WCU students. Demonstrate sensitivity to other students waiting to speak with employers by keeping your questions brief and offering to continue your conversation later. Enjoy the fair and your interaction with the employers. Let your positive attitude show!

Questions to ask an employer:

1. What entry level positions in (mention your career interest) are available in your company? What does this position entail?
2. How much decision-making authority is given after one year?
3. How do these positions fit into the overall organizational structure?
4. What kinds of skills and experience do you look for in the employees you hire?
5. What are the characteristics of your most successful employees?
6. Does your company hire on a continual basis or just at certain times of the year?
7. Does your company have formal training programs, or do employees receive on-the-job training?
8. Can you describe the corporate culture?
