

Western Regional Science Fair at Western Carolina University

NOTE: The 2023 Fair will be in WCU's new Apodaca Science Building
NOT THE RAMSEY CENTER where it has been held in the past.

Parking for the fair will be located in the tiered lot circled in **yellow** below. For those familiar with campus, this location is behind the library. We recommend parking **FIRST** then walking to the Apodaca building following the **WHITE ARROWS** as shown. In case of bad weather, you can drop students and their projects off in front of the building (**Red Arrows**) before parking so long as there is another supervising adult with them at all times. Driving to the lot from Apodaca requires going around the full perimeter of campus (**BLUE ARROWS**)
