

Compressing Video

You may need to compress your video file if you are having difficulty uploading it.

Download Handbrake

Go here:

<https://handbrake.fr/>

Download Handbrake and install it on your computer

Using Handbrake

Open Handbrake and open your video file in it.

The image shows the Handbrake software interface with four numbered callouts:

- 1** Click on the Presets button. Navigate to **Fast 480p30**
- 2** Select: **Fast 480p30**
- 3** Click Browse to select the folder where you want the compressed video to be saved. Rename the video if you wish
- 4** Click Start Encode and wait

The interface includes a menu bar (File, Tools, Presets, Queue, Help), a toolbar (Open Source, Add to Queue, Start Encode, Queue, Preview, Activity Log, Presets), and a main area with source information (Source: ATLA_Iroh, 1280x720, 29.97 FPS), title (1 (00:05:11)), angle (1), range (Chapters), and preset (Fast 1080p30). The main area also has tabs for Summary, Dimensions, Filters, Video, Audio, Subtitles, and Chapters. The Summary tab is active, showing format (MP4), tracks (H.264, AAC), filters (Decomb), and size (1280x720 storage, 1280x720 display). A source preview window shows a scene with a purple '14' overlay. The 'Save As' field is set to 'C:\Users\Inickles\Videos\Atla Iroh-1.m4v' and has a 'Browse' button. The 'When Done' dropdown is set to 'Do nothing'.
